Successfully running the operating theatre is no easy task. From care quality and patient safety, to scheduling and effective resource utilisation, it's a multi-faceted challenge. That's why Cerner has developed real-time perioperative solutions to significantly reduce risk and inefficiencies to optimise both clinical and operational success.

Theatres & anaesthesia | Cerner Norway

General Anaesthesia usually begins with a Pre Med, typically an injection given in the ward. When you arrive in the Operating Theatre (OT), the Anaesthetist will need to insert an intravenous drip (injection on the wrist). He may also need to insert other lines and tubes, depending on the type of operation.

3 Types of Anaesthesia You Should Know About Before Your ...

Much the same can be said of medical matters. There is an increasing demand to provide anaesthesia for patients undergoing procedures outside the operating theatre. Technological advances and an ageing population have increased the demand for complex diagnostic procedures and minimally invasive surgical interventions.
