The Patterns of Adaptive Learning Study

This study investigated how classroom goal structures (mastery and performance goal structures) related to intrinsic motivation and peer modeling focusing on teachers' promoting interaction as a classroom level mediator. Authors tested multilevel mediational models with a sample of 1212 Japanese elementary and junior high school students from 43 classrooms.

(PDF) Discovering Emotion in Classroom Motivation Research

The relation between the learning environment (e.g., students' perceptions of the classroom goal structure and teachers' instructional discourse) and students' reported use of avoidance strategies (self-handicapping, avoidance of help seeking) and preference to avoid novelty in mathematics was examined. Quantitative analyses indicated that students' reports of avoidance behaviors varied ...
