Investigative Task

Models A Normal model can be a useful tool for interpreting what data have to say - sometimes. Your task here is to check the usefulness of such a model for data you collect or create. There are three phases in completing this task: 1. Collect data. You need a data set with 30 - 50 values.

Answer Key

is the final question in the AP Statistics free-response section, but we don't recommend saving it for last.

Because this question is worth three times as much as any of the other free-response questions, you want to make sure you answer it well, or it could really impact your final score.
