API 607 Fire Safe 4th Ed. - ValvTechnologies
These valves are covered by API 6FA fire test standard. 607 Fourth Edition, May 1993 4.4.8 607-I-04/01Will a fire test to API 607, 4th edition conducted on a carbon steel body ball valve with 304 stainless bolts joining body and end caps qualify the use of ASTM A193 B7 studs with either A194-2H or A193 -88M nuts instead of the 304 stainless bolts?

API 607
• Fire Safe API 607 4TH Edition Series F550 flanged valves have been qualified by testing to API standards 607, 4th Edition. The valve design incorporates a secondary metal seat in the body, providing the required shutoff should the primary seats be destroyed by fire. • ASME B16.34 Design

Series F550 Fire Safe API 607 4th Edition Full Port ...
HPF Fire-Safe Ball Valves - Stainless Steel and Carbon Steel 2-Way Ball Valves from 1/2" to 4". The HPF series fire-safe ball valves feature swing-out bodies for inline repair and socket weld connections with heat sink allow welding while assembled. These valves are widely used in petrochemical industry.

Fire-Safe Ball Valves - Certified to API 607 4th Edition
• Fire Safe API 607 4TH Edition Series F554 flanged valves have been qualified by testing to API standards 607, 4th Edition. The valve design incorporates a secondary metal seat in the body, providing the required shutoff should the primary seats be destroyed by fire. • ASME B16.34 Design

Series F554 Fire Safe API 607 4th Edition Standard Port ...
API 607 - FOURTH EDITION Let's return to 1994, when the fourth edition of API 607 was released. The innovation of this edition was that it was the first to require that soft-seated valves be tested at lower pressures.

The Past, Present and Future of Fire Testing
BS6755 Pt 2 has been around since 1987 without any significant revision, API 607 Fourth edition was published in 1993, and prior to this it was the third edition. However there is a very significant difference between the two editions.

What is the difference between Fire Testing to API 607 and ...
Will a fire test to API 607, 4th edition conducted on a carbon steel body ball valve with 304 stainless bolts joining body and end caps qualify the use of ASTM A193 B7 studs with either A194-2H or A193 -88M nuts instead of the 304 stainless bolts? No, see paragraph 4.4.8 No. API 607, 4th edition does not address non-metallic body materials.

American Petroleum Institute
API 607, 5th Ed. Fire Test Certified Valves* Qualified Sizes: If a range of valves is covered by testing of ferritic test valves then the type-testing coverage may be extended to cover austenitic or duplex materials by carrying out a further test on a mid-range size of valve of the same design in that material.
