The improvement in technology from one generation of well logs to another has been remarkable. This is both an asset and a liability. It is an asset for new fields where the most modern technology can be applied. It is a liability for old fields where old logs must be combined with new logs in the analysis of a field.

logging is by introducing the reader to some of the basic concepts of well log analysis. Remember that a borehole represents a dynamic system; that fluid used in the drilling of a well affects the rock surrounding the bore-hole and, therefore, log measurements. In addition, the rock surrounding the borehole has certain properties
