The Breast Cancer Survival Manual, Fifth Edition: A Step ...

The American Cancer Society relies on information from the SEER* database, maintained by the National Cancer Institute (NCI), to provide survival statistics for different types of cancer. The SEER database tracks 5-year relative survival rates for breast cancer in the United States, based on how far the cancer has spread.

Survival Rates for Breast Cancer

Metastatic breast cancer (also called stage IV or advanced breast cancer) is not a specific type of breast cancer. It's the most advanced stage of breast cancer. Metastatic breast cancer is breast cancer that has spread beyond the breast and nearby lymph nodes to other parts of the body (most often the bones, lungs, liver or brain).

Metastatic Breast Cancer - Stage IV | Susan G. Komen®

The 5-year survival rate for women diagnosed with localized breast cancer is about 99 percent. For women who are diagnosed with regional breast cancer, that figure drops to about 86 percent. Women...
