Nutrient burn is most common when feeding cannabis too-high levels of bottled nutrients and especially chemical or mineral nutrients. This is what you'll find in most non-organic plant food. Mineral-based nutrients can help increase cannabis growth rates and yields compared to organic-based nutrients due to the fact that these nutrients are so easily absorbed by the plant roots.

### How to Fix Cannabis Nutrient Burn - Pics & Symptoms

Burn treatment depends upon the location, body surface area, and degree of burn. The skin has an important role to play in the fluid and temperature regulation of the body. If enough skin area is injured, the ability to maintain that control can be lost.
