Emergence of such antibodies during a primary infection, or after prior vaccination or infection, may increase the risk of ADE [Reference Wan 9].

Importantly, we currently lack data on how the balance of neutralizing versus ADE-inducing IgG to SARS-CoV-2 may differ in children and adults. Finally, ADE has been linked to the development of cytokine storm syndrome, which occurs in the most ...

The most important stage for brain development is the beginning of life, starting in the womb and then the first year of life. By the age of three, a child's brain has reached almost 90% of its adult size. This rapid brain growth and circuitry have been estimated at an astounding rate of 700-1000 synapse connections per second in this period. The experiences a baby has with her caregivers ...
