Cells and Heredity, All in One Teaching Resources (Science Explorer, Volume C) Paperback - January 1, 2005 by Prentice Hall Pearson (Editor)

Cells and Heredity, All in One Teaching Resources (Science ...

Heredity - Heredity - Extranuclear DNA: All of the genetic information in a cell was initially thought to be confined to the DNA in the chromosomes of the cell nucleus. It is now known that small circular chromosomes, called extranuclear, or cytoplasmic, DNA, are located in two types of organelles found in the cytoplasm of the cell. These organelles are the mitochondria in animal and plant ...

Heredity - Extranuclear DNA | Britannica

CELL THEORY All living things are composed of cells (the basic units of structure and function in living things) All cells are produced from other cells Cells can provide clues about functions that living things perform Scientists can study cells to learn about growth and production

CELLS and HEREDITY - EMSD63

Heredity, also called inheritance or biological inheritance, is the passing on of traits from parents to their offspring; either through asexual reproduction or sexual reproduction, the offspring cells or organisms acquire the genetic information of their parents.
