Common Engine Problems With Mercruiser Engines

Some Vortec V-6 engines also develop problems with their camshafts, though this seems to be more common among Vortec engines used in industrial applications rather than in passenger vehicles. Severe knocking issues are most common to the L35 and LF6 Vortec V-6 engines built between 1996 and 2002, while oil consumption issues are more common in the LU3 engine built from 2004 to 2009.
