solutions here are of my own authorship, but some were done with the help of this site. The notes.md in each chapter folder (the ones that do have though) contain some theorems or lemmas.. To visualize the equations, I recommend Google Chrome with the extension TeX All the Things or GitHub with MathJax.

and focuses on the arguments of linear algebra using raising and lowering operators and matrix operators. This approach is more modern and elegant than brute force solutions of differential equations in position space, and uses and reinforces Dirac notation, which depends upon the arguments of linear algebra.
