Access Free Nash Liquid Ring Vacuum Pump Compressors ...

Liquid ring vacuum pumps and compressors are rotary machines. They operate according to the positive displacement principle. In these machines, a liquid is made to act as a piston. The liquid is generally water for most of the applications and hence they are also known as water ring water piston or liquid piston rotary

The NASH liquid ring vacuum pump uses water or any other suitable liquid, which acts as “liquid piston”: hence, the name liquid ring. It’s apparent that the chambers between the rotor blades, shown here in yellow, are open around the periphery. However, not easy to see, the chambers are open on the inside, as well.
