### Optimization Models for Decision Making

In psychology, decision-making (also spelled decision making and decisionmaking) is regarded as the cognitive process resulting in the selection of a belief or a course of action among several possible alternative options. Decision-making is the process of identifying and choosing alternatives based on the values, preferences and beliefs of the decision-maker.

### Decision-making - Wikipedia

There are two ends of a spectrum from which to approach this: satisficing and optimizing. Satisficing—a combination of the words “satisfy” and “suffice”—means settling for a less-than-perfect solution when working with limited information. Optimizing involves collecting as much data as possible and trying to find the optimal choice. Generally, decision makers don't pick one or the other—you can think of satisficing to optimizing as a spectrum, and each decision starts with an ...
