Inbound Data Flow: SAP R/3 to Java CAPS. During routine operations, an application on the SAP R/3 system generates a transaction designated for an external system. The ALE interface converts the data from the internal data format to the IDoc format, and sends it via tRFC to the SAP BAPI Adapter, acting as a RFC server.

Inbound Data Flow: SAP R/3 to Java CAPS (About Application ...
The SAP BAPI Adapter transmits the data to SAP R/3. The SAP BAPI Adapter associates the next TID (from a persistent resetable counter) with the transformed outbound message and sends it via tRFC to the SAP R/3 host. If no exceptions are raised by the receiving SAP R/3 host, the next TID is incremented.
