Peugeot 106 torsion bar suspension ?????? ... Lowering any more than that and the shocks are too long and allow the springs to clunk which is also an MOT fail. You cannot have a 65 profile tyre with 14 inch rims if you are lowering at all because it will rub on the rear arches. You need a 60 profile or less. with a 60 profile you can go to 50mm ...

Peugeot 106 torsion bar suspension ?????? | Yahoo Answers

Whereas the 106/saxo for example have bigger rollers and are captive and have a little less of a tendency to be damaged.. But in each case the oil seals are fragile if mishandled.. water gets in and then the whole beam could be destroyed.. The correct way is: To completely remove each of the torsion bars in turn..

Torsion bar adjustment - peugeot 206cc owners club

This is the method I used to lower my own Peugeot 306 GTI-6. I would like to point out that the torsion bars had previously been removed, cleaned & greased & refitted. The o/s torsion bar was seized into the trailing arm, which is very common if they've been in for a few years & needed a 10 tonne hydraulic puller to free it.

Torsion Bar Lowering FAQ - FAQ Forum - Peugeot 306 GTI-6 ...

No problem mate, to adjust the torsion bars is easy its just unsizing them is the problem, Ive just lowered willhotdogs 206 on saturday and the hole car took me a good 6hrs and atleast 4hrs was for the rear, and thats with all the tools, ramp, bunnners, pullers and 12yrs experance! my work would charge £50 + VAT an hour until it was done!
