Plague: A Very Short Introduction - Paul Slack - Google Books

The plague is a disease caused by a bacillus, *Yersinia pestis*, transmitted by the bite of an infected flea. 'Plague' identifies three main periods of the pandemic. It first appeared in the sixth century ce with several epidemics in Europe and the Near East lasting until the end of the eight century.

1. Plague - Very Short Introductions

Even though I have previously read a number of books on pandemics, I learned a lot from this "very short" account. For example, the plague (*Yersinia pestis*) was first recorded as the "Plague of Justinian," in the Byzantine Empire. The Greek historian Procopius said that 10,000 died in a single day in Constantinople in 542.
