The term is applied descriptively to groups of primates, such as families of New World monkeys and Old World monkeys. Many monkey species are tree-dwelling (arboreal), although there are species that live primarily on the ground, such as baboons. Most species are also active during the day (diurnal).

Monkey - Wikipedia

When his father saw a monkey the next day, he launched a search in the jungle behind his house. Using his brother's phone to call the device, he found it covered in mud under a palm tree.

Just monkeying around: Primate takes phone, then selfies ...

He said the primate must have thought it was food as it has a colourful casing. Most of the images were blurry, but some showed the monkey's face. One of the videos taken from atop a tree showed glimpses of the monkey opening his mouth and appearing to try to eat the phone.
