Wireshark Lab: DNS

Wireshark makes DNS packets easy to find in a traffic capture. The built-in dns filter in Wireshark shows only DNS protocol traffic. Also, as shown below, DNS traffic is shown in a light blue in Wireshark by default. DNS is a bit of an unusual protocol in that it can run on several different lower-level protocols.

Wireshark Lab 3: DNS | Sarah Bedford

Wireshark is the world's foremost and widely-used network protocol analyzer. It lets you see what's happening on your network at a microscopic level and is the de facto (and often de jure) standard across many commercial and non-profit enterprises, government agencies, and educational institutions.

Wireshark DNS v6 - University of Tennessee at Chattanooga

While it's true what @Jaap says regarding the screenshot, I'll to make an assumption. The size of the frames and the uniform length pattern (44, 80, 84) does not match a typical DNS query/answer. So I guess that's traffic where Wireshark only believes it could be DNS, based on the protocol and port (TCP/UDP 53), but in reality it's something totally different, hence the "Malformed Packet".

Why am I seeing malformed packets on my ... - Wireshark Q&A

Answer: According to the screenshot below, the sequence number of the SYN_ACK segment sent by gaia.cs.umass.edu to the client computer in reply to the SYN is 0. The value of the acknowledgement field in the SYN_ACK segment is determined by the server gaia.cs.umass.edu. The
